

# PANASONIC MOBILE SOFTPHONE

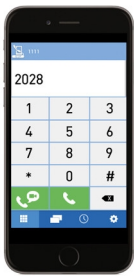

## THE FREEDOM TO CONNECT MOBILE WORKERS WITH COMPLETE CONTROL

The Panasonic Mobile Softphone is a simple but highly secure application that enables your workforce to use their smartphone as a registered company extension, inside or outside the office network but without sharing their mobile contact details. Plus with the built-in Push Notification feature, incoming calls can be presented to the device even when the Mobile Softphone application is closed avoiding missed calls and lost opportunities, all without any additional server equipment required.

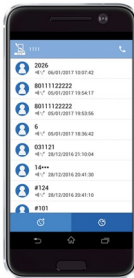

### Combining audio and video

With the flexibility to stay connected from any location, the Panasonic Mobile Softphone also provides support for both audio and video conversation with other Mobile Softphone users, KX-HDV430 SIP Terminal users or any of the KX-NTV door entry camera devices for monitoring and door release, when connected to the Panasonic KX-NS or NSX Series communications systems.
